

Green Lake Fields – Take-down Routine

Maps showing field numbering and interior marking layouts at Green Lake are available on our website:

http://www.woodlandsoccer.org/forms/GreenLake_Final_Layout_2009.PDF

1. Net Removal Duties

All nets and field numbering signs are removed from Fields 1-6 and stored in the tan WSC locker at the SW baseball diamond. This is near Soccer Field #4. The bin is locked with a keyed lock. The bin will be unlocked Friday afternoons and will stay open through the weekend.

The storage bin lid tends to stick. PULL HARD UPWARDS to open the lid.

Grab the plastic containers for the net clips.

Take down nets from all 6 fields:

- Remove the number sign from the net. Make sure to keep the pear shaped metal rings (Qty 2) attached to each sign. These are easily lost!
- Unclip the white plastic Kwik Goal net clip (look like this: **Ω**) from the goal frame. The clips are removed by twisting the clips 90 degrees so they are parallel with the channel in the frame.
- Store all net clips in plastic containers. **Do not leave the clips attached to the net. They fall off easily and are lost.**
- Neatly fold and roll up the net.
- Unclip the black nylon rope from the top corner braces of the goal. Wrap the rope around the net.
- Store the nets, field number signs, and plastic clip containers in the storage locker.

2. Goal Anchors

All goals should already be held in place with 4 stakes. **DO NOT REMOVE THE STAKES.** They will be anchored for the entire season.

3. Storage Locker

All supplies are stored in the tan WSC locker noted above. The bin is locked with a keyed lock. The bin will be unlocked all weekend for field duties.

The lid tends to stick. You may need to PULL HARD UPWARDS to open.

- Confirm that the all the supplies have been returned to the bin:
 - Qty 12 – Field Number Signs
 - Qty 8 – 6.5' x 12' Nets (Fields 1-4)
 - Qty 4 – 6.5' x 18' Nets (Fields 5 & 6)
 - Qty 3 – Plastic bins with net clips.
 - Qty 2 - Paint Liners
- If any contents are missing, please call Ray Farbarik at 206.383.1305 before leaving the fields.
- Place the nets in the storage locker on top of the field liners. Store the 6.5 x 12' nets on the left side; store the 6.5 x 18' nets on the right side.
- Place the field number signs (Qty 12) on the top shelf of the storage locker.
- Place the plastic bins on the middle shelf of the storage locker. DO NOT place on top shelf or they will get crushed when the lid is closed.
- Lock the WSC Locker. There is a single lock on the front, left side of the locker. The keyed lock is recessed in a small cut-out in the bin. Push the lock inward, until it locks. The lid must be completely closed for the lock to engage.

4. Questions / Problems
